

CivicPulse

Every Citizen's **Voice. Verified. Prioritized. Acted Upon.**

Voice-First AI Platform for Constituency Development Planning

Inclusive
for All

Verified by
Community & AI

Data-Driven
Priorities

Accountable
Governance

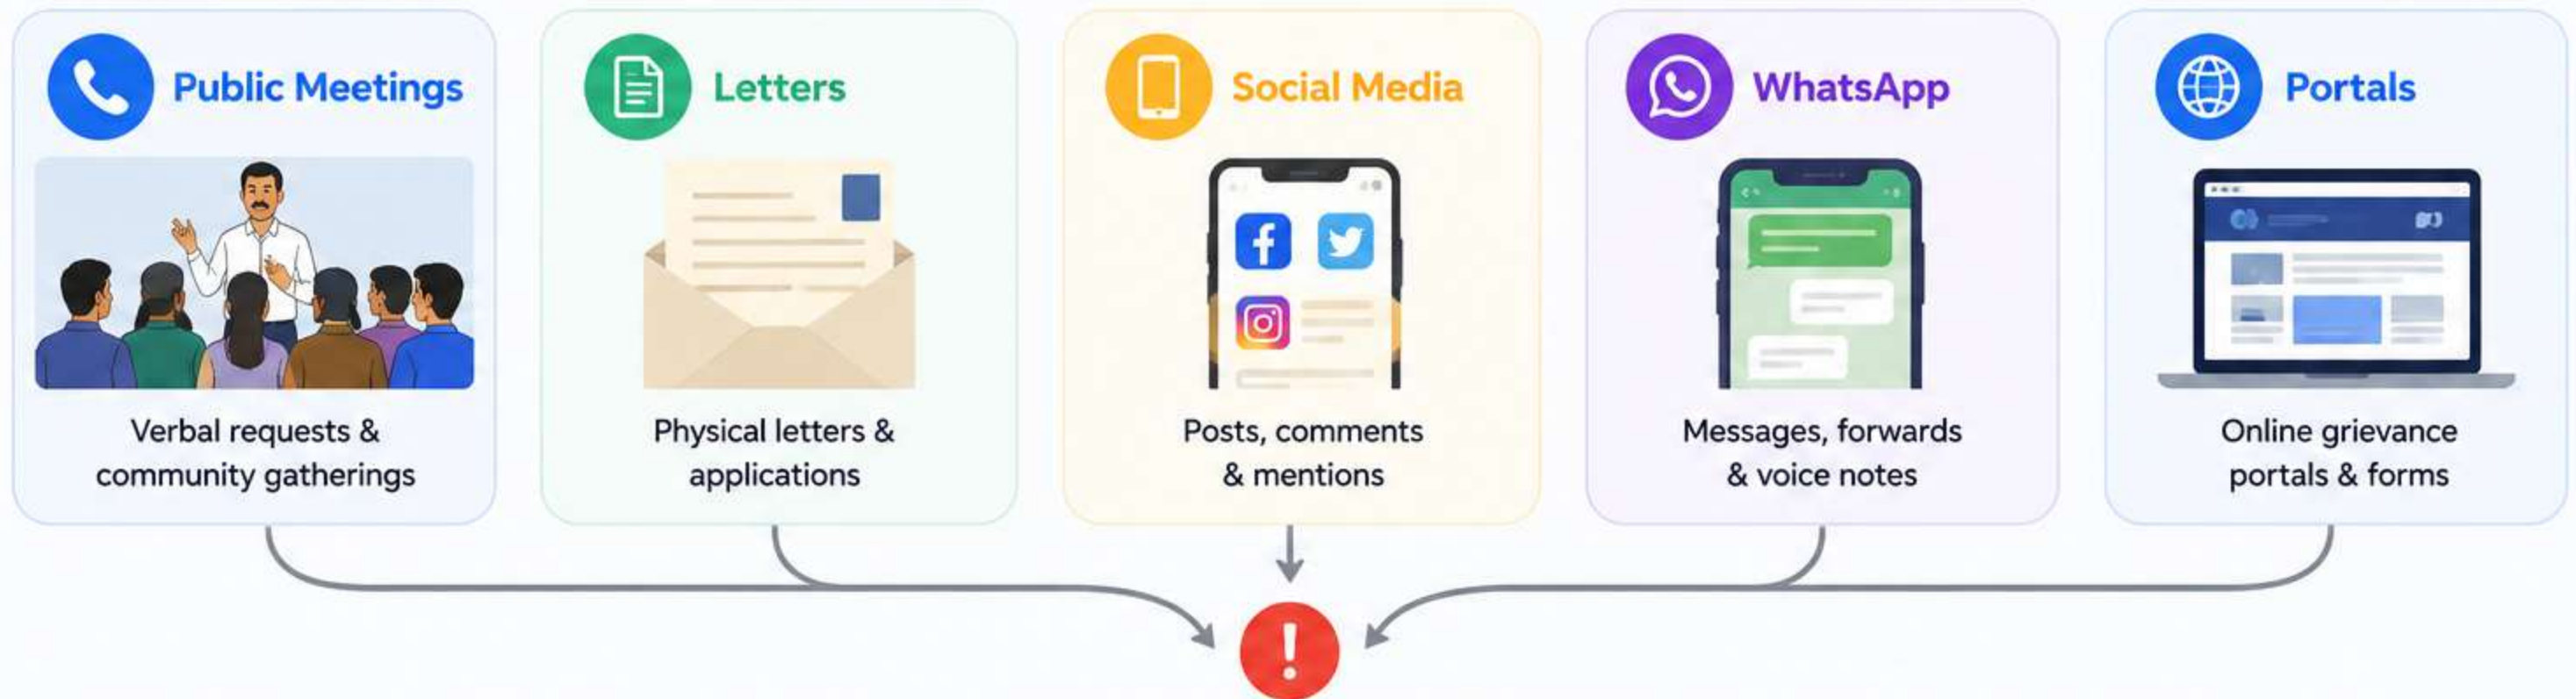

Let's build **stronger constituencies**, together.

Development Decisions Lack Citizen-Centric Intelligence

Citizens submit requests through multiple disconnected channels

CURRENT CHALLENGES

Fragmented Feedback
Information is scattered across many channels and formats

No Prioritization
No objective way to identify which issues matter most

Low-Literacy Excluded
Digitally unaware citizens struggle to submit and be heard

No Transparency
Citizens don't know what happens after raising an issue

No Accountability
No system to ensure follow-up, tracking or responsibility

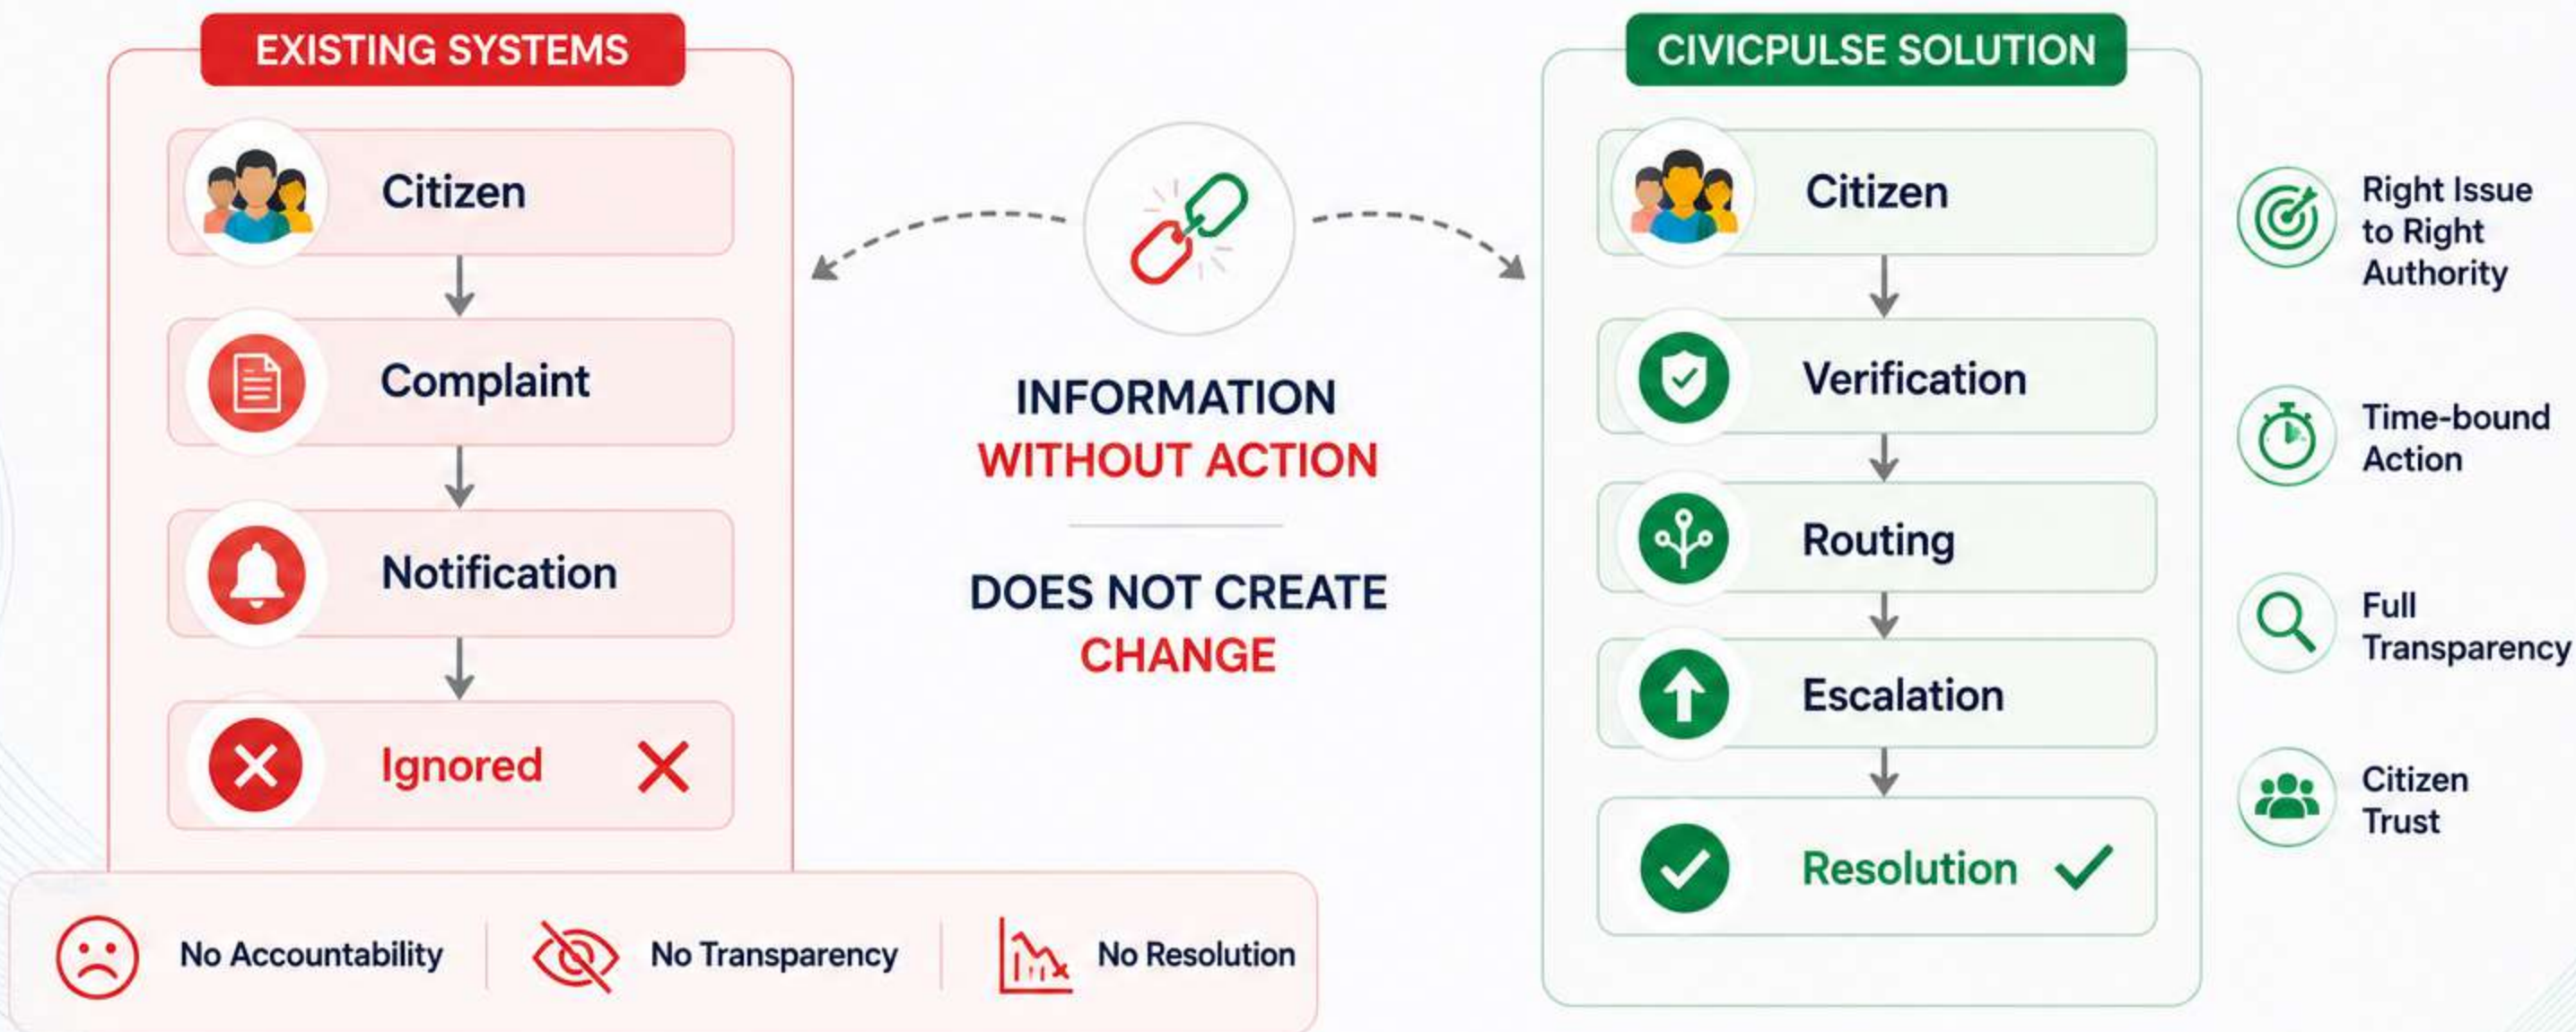

Development decisions are often **reactive**, **fragmented**, and **non-data-driven**.

THE MISSING LINK

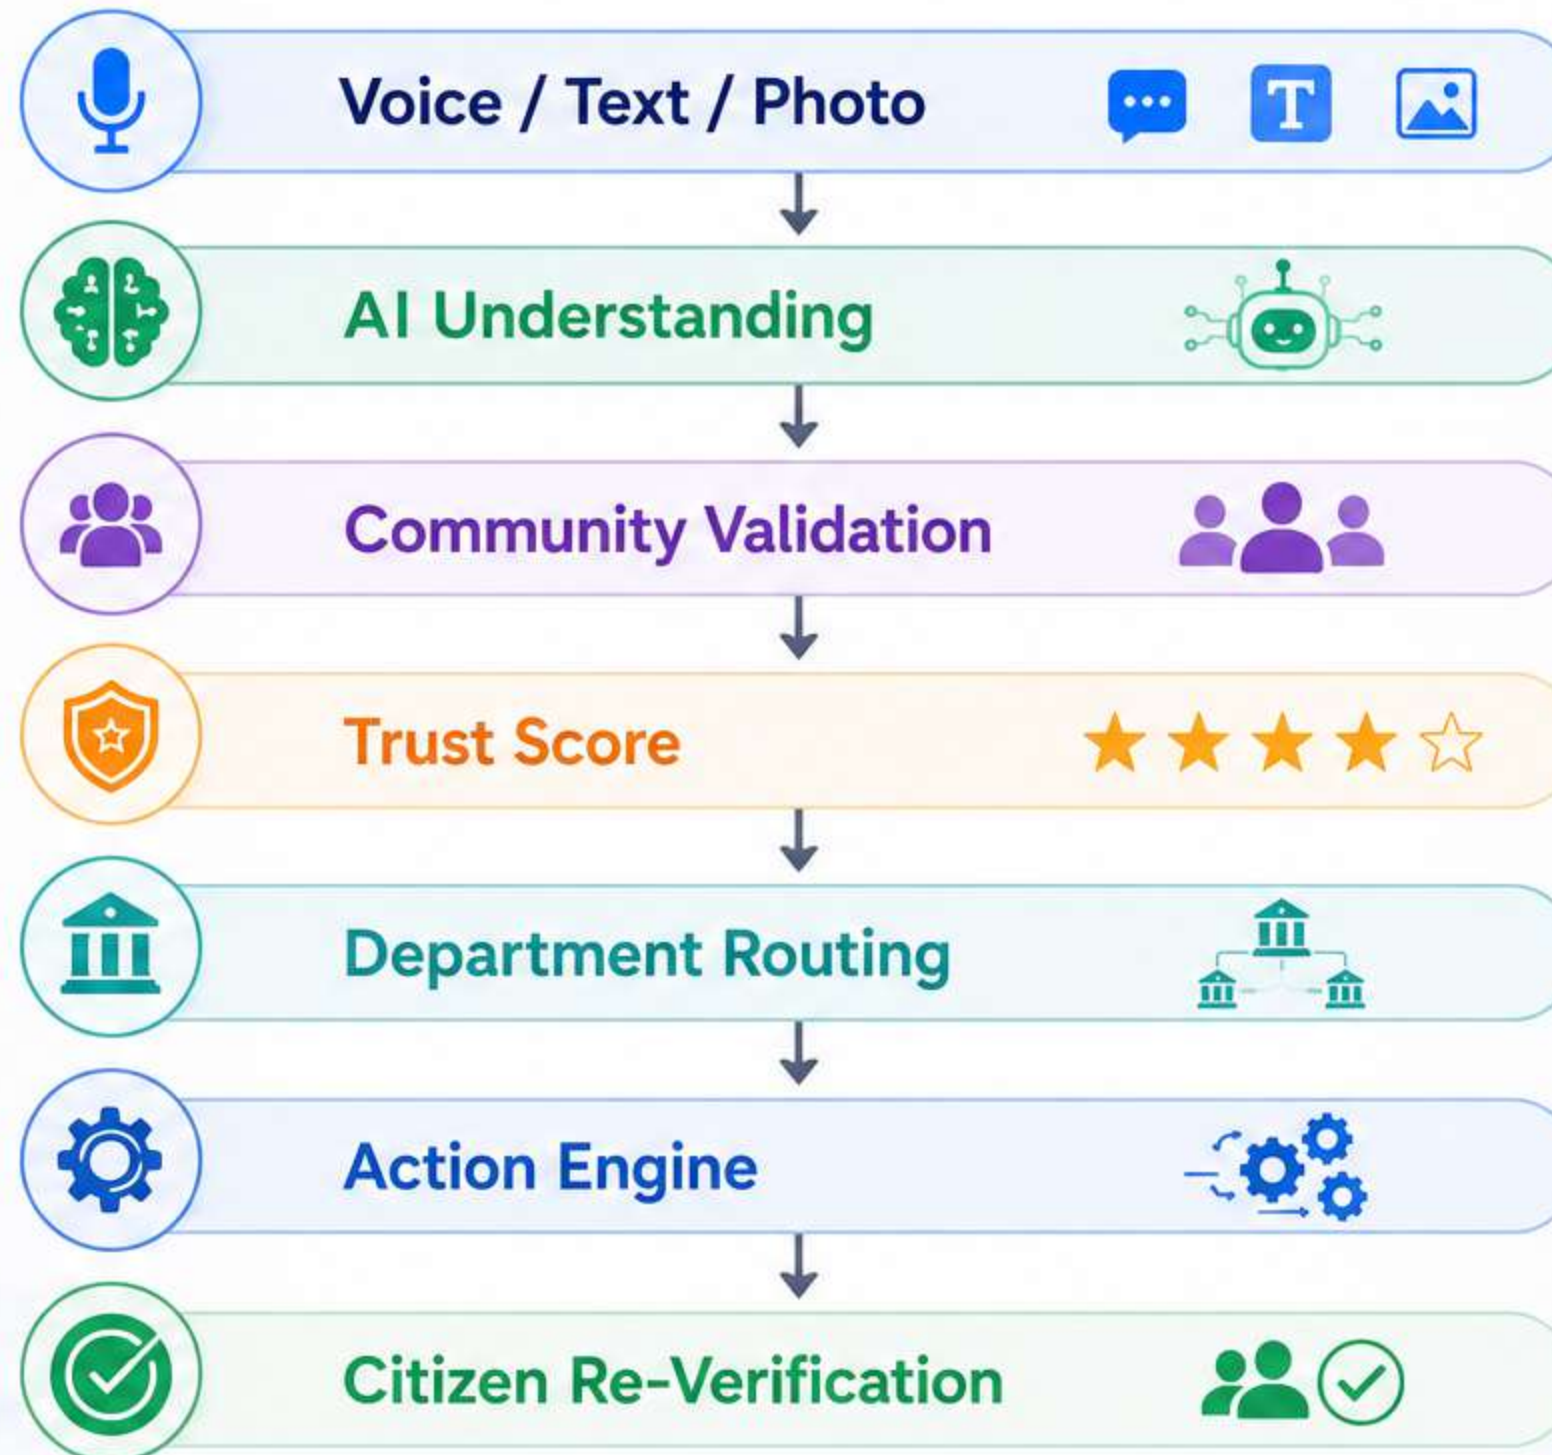

Existing Systems Collect Complaints.
They Don't Ensure Action.

— OUR SOLUTION —

CivicPulse

Governance Execution Engine

Technology Adapts to Citizens

Three simple ways to raise development suggestions

MODE 1

Voice Only

Zero literacy users.

Just speak in your language. We will handle the rest.

MODE 2

Voice + Touch

Basic smartphone users.

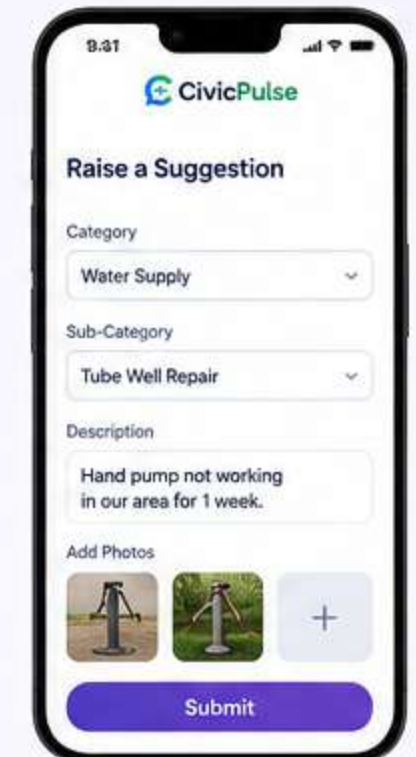

Speak or tap. Easy options to share your issue.

MODE 3

Full Control

Educated users.

Complete control to add details, photos, location and more.

Multilingual

Available in 22+ languages to reach every citizen.

Voice Assistant

Intelligent voice assistant guides citizens at every step.

Auto Language Detection

Understands the language automatically and responds in the same.

One platform. Every citizen. Every language. **Every voice matters.**

How Do We Ensure Trust?

Every report is verified, validated and scored for trust
